

Die Situation in Griechenland (Kalamata)

”...

I shared your Mail to Kelly (Erasmus – Partner) and to the headmaster of our school.

Thank you for your interest and I really enjoy our communication.

We are still in our houses and our country tries for the best considering our low abilities. I am a housewife with 4 children and at the same time a teacher via Internet. I also study hard form my Phd and I have a permission for going some times in the university for my experiments.

I am hope looking forward to go to the sea in my town with friends form Kalamata and Germany too.
