

Hi ..., thanks for sharing the CGL-photo.

Our school opened two weeks ago. Above all, administrative tasks and tutorials are carried out with small groups of students. Teachers will have to go next week to evaluate the courses that end the educational cycle. The rest of the evaluations will also be online.

Actually, things are getting back to normal faster than we thought a few weeks ago. In many cases it only differs from the previous situation by the use of masks.

It is true now, after the health crisis, the hardest will be the socioeconomic crisis. Spain's GDP* is 12 – 14% dependent on the tourist sector and this summer it will suffer.

Another uncertainty is how we will start next school year, with new instructions being issued on a daily basis.

Here, we already enjoy summer time and outdoor activities are recovering, including the beach.

I wish everything goes well for you,

we are in contact.

Best regards!
